“ERMO Group” is V2000 - Iso 9001 Certified .

Marcillé La Ville/France – June 4th, 2007 – Ermo the international mold maker highly skilled in short cycle time high quality molds (Food, Body Care and Medical), has been V2000 Iso certified, mid of May 2007.

“That’s a great enhancing value for ERMO on our key markets ... ”, declared Jean-Yves Pichereau, CEO of ERMO. “Ermo is really active since years in high value markets, and getting the V2000 Iso 9001 certification, is a recognition of the continuous efforts we have made through the last years.”

“Good job from all the team ! ” said Carine Pavard the Quality manager of Ermo. “More volumes, shorter cycle times and always more technologies like Stack Molds, IML, multi-component... that’s our daily job and we have to do it right, in time. That’s a good update, we had to move out from the V94 to V2000 which is definitely more focussed on the customer expectations and the company performance.”

About ERMO

ERMO is skilled in design and manufacturing of Injection molds, well focussed on Packaging (food, health & beauty and medical).

With 25 years back ground in mold making, Ermo also developed additional skills as strong design and project teams, able to support its world wide customers (50% of business is for export), as well as a wide testing center, equipped with 11 mono-component and bi-component molding machines.

Thin wall parts, bi-components, tri-components, high cavitations, high speed in-mold flip top closing systems, stack molds, IML... a wide coverage for a precise market.
